

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Mearns on New African Birds.¹—In this, his thirteenth paper on new African birds, Dr. Mearns first considers the subspecies of *Turacus hartlaubi* of which he recognizes four, *T. h. medius* (p. 3) Mt. Kenia, *T. h. crissalis* (p. 3), Mt. Mbololo and *T. h. caerulescens* (p. 4), Mt. Gargues, being described as new. He also describes the following new forms, *Corythaëla cristata yalensis* (p. 5), Yala River; *Cursorius gallicus meruensis* (p. 5), Meru River; *C. temminckii jebelensis* (p. 6), Lado Enclave; *Rhinoptilus africanus raffertyi* (p. 7), Iron Bridge, Hawash River, Abyssinia, and *Sarothrura loringi* (p. 8), Mt. Kenia.—W. S.

Beal on the Food Habits of Thrushes.²—This report is supplementary to Bulletin No. 171, which treated of the Robin and Bluebirds, and is devoted to Townsend's Solitaire and the speckled breasted thrushes of the genus *Hylocichla*. Increased material and further investigation have led to much more detailed analyses of the food of these birds than those which have appeared in other publications of the Biological Survey, but the general conclusions remain the same. The thrushes are largely insectivorous, while the vegetable portion of their food (40.72 per cent) consists mainly of wild berries, their destruction of domestic fruits being negligible.—W. S.

Miller on Three New Genera of Birds.³—Mr. Miller is doing excellent work in carefully examining the structural characters of various birds with regard to their generic position, as many species when first described were hastily referred to genera to which they have no close affinity and a certain number have never been removed. A case in point is the large owl *Bubo blakistoni* Seebohm and its ally *B. daerriesi*. These Mr. Miller finds are not referable to *Bubo* at all being evidently northern representatives of the Fish Owls (*Ketupa*), and he establishes for them a new genus *Strigonax* (p. 515) with *B. blakistoni* as the type.

For *Hydropsalis lyra* Bp. he proposes the genus *Uropsalis* (p. 516) and for *Picus striatus* Müll. the genus *Chryserpes* (p. 517) on account of differences in relative length of quills and toes, and details of bill structure, from the genera *Hydropsalis* and *Centurus* to which they have been respectively referred. *Chryserpes* also exhibits striking peculiarities in coloration.

Mr. Miller besides erecting these new genera considers the status of allied groups already separated which is perhaps of even greater impor-

¹ Descriptions of Seven New Subspecies and One New Species of African Birds (Plantain-Eater, Courser, and Rail). By Edgar A. Mearns. Smithsonian Misc. Collns., Vol. 65, No. 13, November 26, 1915.

² Food Habits of the Thrushes of the United States. By F. E. L. Beal. Bulletin No. 280, U. S. Dept. of Agriculture, September 27, 1915, pp. 1-23. (For sale by Supt. of Documents, Gov't. Printing Office, Washington, D. C., 5 cents.)

³ Three New Genera of Birds. By W. DeWitt Miller. Bull. Amer. Mus. Nat. Hist., XXXIV, Art. XVII, pp. 515-520, New York, October 20, 1915.
